

## Central Texas *Eurycea* Bibliography

v. September 17, 2013

This bibliography was created with the goal of compiling a comprehensive list of research papers and natural history observations on the central Texas *Eurycea* salamanders that would serve as a resource for scientists, habitat managers and policymakers. It is the product of joint interest in such a resource at the first meeting of the *Eurycea* Alliance in May 2011 at Texas State University – San Marcos. The *Eurycea* Alliance is an interdisciplinary working group of scientists and natural resource managers dedicated to advancing research and conservation of the neotenic *Eurycea* salamanders of central Texas. More information can be found at [www.eurycealliance.org](http://www.eurycealliance.org).

The body of scientific literature regarding this unique group of salamanders extends back well over 116 years to Stejneger's 1896 original description of the Texas Blind Salamander (*Eurycea rathbuni*). As of September 2013, this bibliography contains more than 200 scientific papers and reports by 120+ scientists about the central Texas *Eurycea* and their habitat. It includes more than 50 government and consultant reports, 30 masters theses and dissertations, 130 peer-reviewed articles, books and conference proceedings, not to mention the wealth of unpublished information that exists in natural history collections, field notes, databases and presentations from scientific meetings.

Updates and notifications of new citations should be sent to [eurycealliance@gmail.com](mailto:eurycealliance@gmail.com). The authors are especially interested in obtaining PDF reprints of articles marked with a ~ that we can add to a growing database of reprints. If you do not have access to article reprints through your institution, please send an email to [eurycealliance@gmail.com](mailto:eurycealliance@gmail.com) for assistance with finding copies of specific articles.
